MESSAGE

Infectious and several non-infectious diseases are a major public health problem in Tropical Countries like India. Many of these diseases remain neglected even in developed nations, the reappearance of these neglected tropical diseases makes them more noteworthy. Millions of lives are lost every year due to vector borne diseases, respiratory tract illnesses, zoonoses, helminthic and other parasitic diseases, poisoning and animal bites.

To understand the pathophysiology and epidemiology and management of these tropical diseases "Resource Center of Tropical and Infectious Diseases (RCTID)" has been established at AIIMS Bhopal. This center is an upcoming center with mandate of service delivery to population at large, work force development and trans-disciplinary operational research in the field of tropical and infectious diseases.

I on behalf of myself, faculty and staff of AIIMS, Bhopal welcome you all to RCTID. The AIIMS, Bhopal as a whole and RCTID in particular will be honoured to collaborate with you and share relevant knowledge.

Together we can make a difference.

Prof. (Dr.) Sarman Singh
